

Report Period: Aug 17-30

Summary of Progress in this Period

- Met as a team, introduced ourselves, shared skills and experiences
 - Discussed team roles and expectations
 - Team members assumed project roles
 - Met with faculty advisor/client and discussed project, budget, constraints, etc.
 - Began discussion of technologies, frameworks, and hardware to use for the project
-

Pending Issues

- Market research/survey
 - Determine if there is an AR platform with a good simulator, which might make remote/distanced development and testing easier
 - Get more explicit project requirements from client
-

Plans for Upcoming Reporting Period

- Conduct “Market Survey” to determine what technologies/hardware exist relevant to our project
 - Begin weighing pros and cons of “buy vs build” for frameworks/hardware
 - Begin comparing potential augmented reality hardware and essential features
 - Begin experimenting with different computer vision options to determine what best fits our needs
 - Consider security implications with any potential hardware or software we may want to use
 - Be more enthusiastic! Get excited about the project!
-
